

# Off-Grid Digest – Getting Started Guide

## 1. Installation

- Download the Off-Grid Digest .dmg file from the provided link.
- Open the .dmg and drag 'Off-Grid Digest.app' into your Applications folder.
- Launch the app from Applications or Spotlight.

## 2. First-Run Permissions

- On first run, macOS will request Full Disk Access permissions.
- Grant access under System Settings → Privacy & Security → Full Disk Access.
- Allow for /usr/bin/osascript and /usr/bin/sqlite3 so the app can read Messages & Call History.

## 3. Configure Your Off-Grid Window

- Click the menu bar icon (■) to open settings.
- Set your start and end times for the off-grid window.
- Enter your forwarding email address (e.g., your ZOLEO address).
- Toggle 'Enabled' to ON.

## 4. Verify the LaunchAgent

- The app installs a LaunchAgent to run every 5 minutes automatically.
- You can force a manual run using the 'Kick Now' button in the menu.
- Logs are stored under ~/Library/Logs/ForwardMessages.log for troubleshooting.

## 5. Uninstall

- Quit the app from the menu bar.
- Remove Off-Grid Digest.app from Applications.
- Delete configuration files under ~/Library/Application Support/MsgForward/ if desired.
